HUMBOLDT BRONCOS

Humboldt Broncos Litter

Strong

We are honored to be the foster parents of Strong, from this very special litter. Strong is a wonderful, gentle dog.

She lives up to her name. She is calm, fearless and confident, nothing ever scares her. She has a strong personality, she likes to take lead in games. She loves to run fast. She might be the fastest lab we know!

Strong is a very happy dog. She enjoys playing with dogs small and large, she loves children, and she is very gentle with babies. At home Strong likes to cuddle and she is fond of her big "sister" Zippy, whose every step she is trying to follow.

HUMBOLDT BRONCOS

Hope

Our family has had the great pleasure of having both Mishka (mum to Humboldt litter) and fostering one of her pups, Hope.

Hope is an extremely gentle and affectionate girl. She is full of energy and often bounces with excitement at the thought of food or play. She is often looking for affection whether it's from humans or mum.

We are a busy family always on the go, from attending Rugby tournaments to long walks at the Toronto Beach boardwalk, Hope is always up for adventures and ready to learn while remaining well behaved.

Hope is a very bright, inquisitive and affectionate dog that will make an incredible change to someone's life in the future!

Hero

Hero is doing very well in his training and is so loved. For a puppy that hated any attention when we first got him, he has become the biggest love bug and is very in tune with emotions.

Some of his favourite things are peanut butter, bananas, ice cubes and sticks. He comes with us just about everywhere including work and has been exposed to all sorts of noises and sounds. Thankfully Hero will do anything for food and has mastered many of the commands instructed by Dog Guides. My partner and I hope he continues to do well and successfully become a Dog Guide and someone's best friend!

HUMBOLDT BRONCOS

Bronco

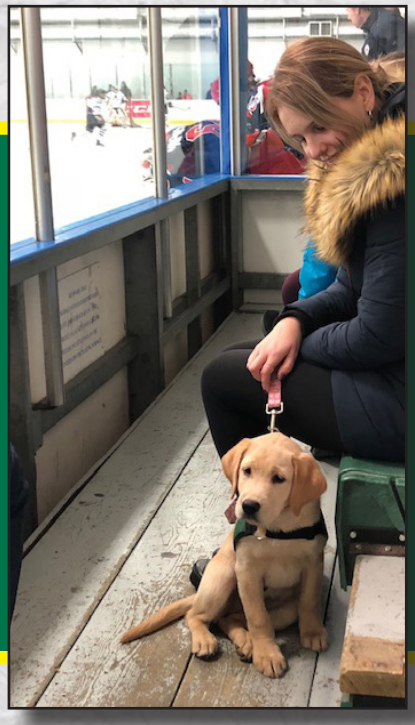
Bronco, like his namesake, is a big, strong, energetic boy. He has just turned 9 months old and is already tipping the scales at 80 lbs!

He is a beautiful dog, with everyone he meets commenting on how handsome he is. Bronco is also very smart, learning new commands or instructions very quickly, sometimes on the first attempt. He is very social and loves being around people, often coming to work with us where he is immensely popular. In fact, the office crowd gets very upset when Bronco does not come to work. He was even featured in the company's newsletter! Although he is very playful, he is also a calm and a gentle giant around small children.

HUMBOLDT BRONCOS

Brave

Brave is a very curious girl. She likes to start her days with a long ravine walk.

We are a hockey family, so when we heard that she was named in honour of such a special team, we felt like she was destined to be our foster dog. Since both of my sons play rep hockey, Brave spends a lot of time at the rinks visiting all the players, coaches, and Zamboni drivers. She's become a staple at all of the hockey games!


In addition to being super curious about everything, she loves to run, play with the kids, and visit the grocery stores, libraries and public pools. She is also doing very well with her training and we a hope she continues on this path and graduates as a Dog Guide along with her siblings.
